

ALSTOR 840 PRO ENG

ALSTOR **8x8**

ALSTOR 840 PRO

A hydrostatic combi machine.

With the Alstor 840 Pro, we launch a new machine type based on the same proven principles the ALSTOR . With its hydrostatic transmission, the 840 Pro extends the Alstor range and gives you av machine with unrivalled efficiency in the forest. Just like our other models, the 840 Pro is constructed from Swedish, High-Strength Steel and assembled with modern technologies.

The variable hydrostatic transmission ensures efficient and safe operation in all situations. With its differential locks applied, the machine can climb logs, boulders and difficult terrain where others give up. With differential's unlocked you will leave the ground untouched with the Alstor's ultra low foot print.

The Alstor 840 Pro is a true, forwarder/ harvester combi machine. The rear bunks of the 840 Pro can be simply removed and its 5m crane can be mounted with a small harvester head, to carry out thinning and clearing in difficult and sensitive areas. With the 840 Pro the operator has more control, which significantly improves productivity. The new chassis is a highly flexible load carrier with numerous possibilities for customised adaptation and new challenges.

Maximum load: 3000 kg

Length: Standard 5.37 m/Long 5.77 m

Width: 1.57 m

Curb weight: 2450 kg

Engine: 3-cylinder diesel, 25 hp

Electrical system: 12 V, 60 A generator

Transmission: Hydrostatic transmission with lockable differential Front and rear, full-time 8-wheel drive. Variable high and low gears.

Brakes: Transmission service brake, mechanical parking brake.

Steering: Orbitrol power steering, tilting steering column, Reverse drive and steering as standard.

Tyres: 25x12.5-10, 8-ply (27" optional)

Travel speed: 0–18 km/h

Crane: Extension crane 5,0 m reach/300 kg lifting capacity.

Stroke harvesting head: Tapio 160. Cutting diameter 25 cm.

Weight 230 kg. Length measuring wheel and proprietary software. Includes counterweight 1000kg.

The machines in the pictures can be extra equipped.
